

# Expressive Cue Listing

**NOTE: This feature is specific to Loquendo voices.**

Expressive Cues are a set of special tags which you may use in your text to specify distinct non-verbal expressions, such as laughing, crying, sighing, coughing, etc.

Expressive Cues tags are placed directly in your text.

For example, "clearing throat" sound:

`\_Throat_01` you may want to consider checking out our specials!

Or -

`\_Hurrah` I am so happy to see you! `\_Whistle_01`

**NOTE: You must prepend all Expressive Cues with another ‘\’ character when using them in API functions. For example:**  
`sayText("Hello World \\_Laugh",5,1,2);`

Every voice is unique in the Expressive Cues it supports. Some voices support many, others few. A complete list of Expressive Cue tags supported by each of the voices can be found in the [Expressive Cues Listing](#).
